FALL-SPRING

List No. 16A

SEEDS • CUT FLOWERS and ROCKERY PERENNIALS • BULBS

FROM THE DEPRESSION HAS COME AN ENORMOUS STIMULATION OF HOME GARDENING.

OLD-FASHIONED GARDENS GIANT PANSIES

IMPROVED SWISS GIANTS—Plants are grown from seed of our own mixture composed of several choice strains of giant pansies, very free flowering. Strong plants for October and November shipment. 25 plants 50 cents; 50 plants 85 cents; 100 plants \$1.50; 500 plants \$6.00

PEONIES BARGAINS AT UNUSUALLY LOW PRICE

We have about 10,000 peonies from which the labels have been lost and know the mixture to contain such outstanding varieties as ALBATRE; DUC de WELLINGTON; EDOUARD ANDRE; EDULIS SUPERBA; FELIX CROUSSE; FESTIVA MAXIMA and other such worthwhile varieties. Although we cannot guarantee any separate colors we will do our best to supply you with different varieties where quantities are ordered. Strong roots with developed eyes 15 cents each; 2 for 25 cents; 5 for 50 cents; \$7.00 per 100.

NOTE: Separate colors labeled true to name of the above varieties can be furnished at 50 cents each; \$5.00 per dozen.

PAEONIA OFFICINALIS RUBRO PLENA; rich dark crimson. The darkest variety ever introduced of the old fashioned May flowering of the old gardens. Very early and handsome. Strong 2 year roots 75 cents each; 10 for \$6.00.

NEW Outstanding Novelties

I have listed under this heading very pretty varieties that should have a prominent place in every garden.

ERIGERON SPECIOSUS (Aster)

Dark flowers in great abundance from June to frost. Clumps 25 cents each; 5 for \$1.00.

HEUCHERA PLUIE de FEU (Rain of Fire)

Bright firey-red alum root or coral bell. Clumps 25 cents each; 5 for \$1.00.

VERONICA TEUCRIUM RUPESTRIS

HEAVENLY BLUE: Blooms earlier than the others. A very striking variety with masses of rich blue flowers. 4 inches. Clumps 35 cents each; 3 for \$1.00.

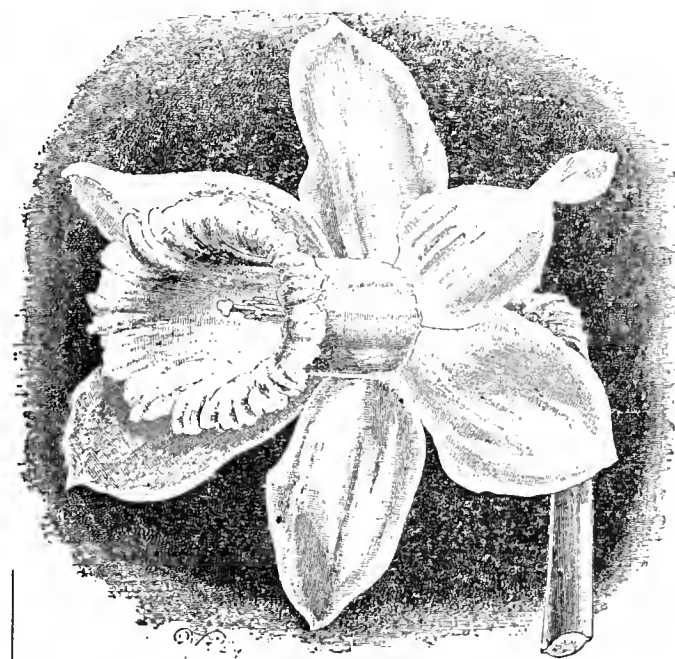

VERONICA (True Blue Boy)

BLUE BOY: A new deep blue variety growing almost upright from 10-12 inches, but trailing enough to make it graceful. Holds up well when cut and is ideal for bedding or rock gardens. Clumps 25 cents each; 5 for \$1.00.

ARMERIA LAUCHEANA (Thrift)

Produces a mass of rosey-crimson flowers all summer. Fine for edging or planting in masses or rock gardens. 6 inches tall. The grassy green tufts re-

VERONICA MADAME DE GRA

(For Fall Bulbs see P. 8)

Dear Friends and Patrons:—

I take this means to thank you for your valued orders and kind patronage and sincerely hope that you have enjoyed the plants and flowers I have sent you, equally as well as the pleasure I have had in filling your orders.

When compiling this new list of items for fall planting I have put forth special effort to list many new and improved varieties including a number of outstanding flowers that I know you will enjoy. I have not tried to offer an extensive list of Holland Bulbs, being content to seek out some of the best varieties of Tulips and Hyacinths, good, solid bulbs and sizes that will produce gorgeous flowers, making the price as reasonable as possible for the quality I offer.

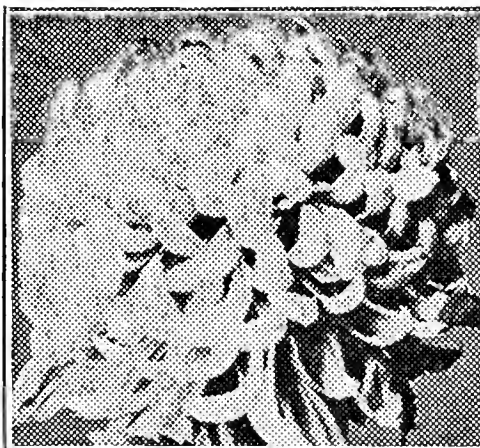

In order to have beautiful gardens of the future the time to plant is always now. During the fall months all items of perennials and hardy bulbs should be set out as early as possible so as to allow them time to become well rooted before heavy frosts set in. Perennials should be planted deeper at this time of the year than during the spring. The mulching should not be done too early. Mid-November to Thanksgiving is about the time to mulch or cover the flower beds. This little extra care in planting will repay you with a gratifying array of flowers that you can truly enjoy.

Do not forget the sowing of seeds. Many hardy items and hardy annual seed may be broadcast in the garden during the fall and without further effort produce some gorgeous flowers.

With best wishes for the success of your garden, I am

Sincerely yours,

JOHN L. LOCKARD, Prop.

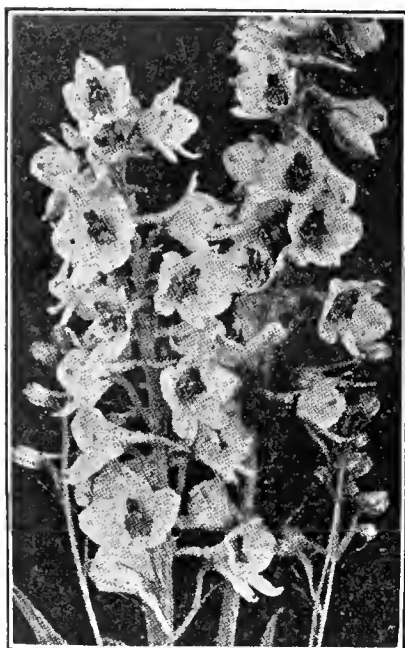

SUN GOLD (Rich Gold)

LARGE EXHIBITION CHRYSANTHEMUMS

Can be grown successfully outdoors. The plants should be set out throughout June or early July in rich, well fertilized soil, spaced about 8 inches either way in rows or beds. When the plants start growing and have reached about 10 inches they should be given stakes so that three feet of the stake is out of the ground. Tie the plants up early therefore avoid weak and crooked stems. When the buds appear break out all but one or two. Keep all succors and other shoots off. Feed the plants moderately every week until the selected buds start to swell.

NOTE: Extra large clumps of the above varieties 20 cents each; 3 for 50 cents; 1 doz. \$1.75 via Express collect.

PACHYSANDRA Japanese Spurge

Most Satisfactory Evergreen Ground Cover

Pachysandra is recognized as the hardiest, quick growing, dense covering that we can establish in dense shade, under trees and shrubbery and other unsightly, shaded places where it is impossible to grow grass. It quickly adapts itself to the conditions under which grass will not grow. Quickly forming a thick mat of clean, green foliage about 8 inches high. Plants should be set 6x6 inches apart for quick, dense coverage.

Thrifty two year plants, 25 for \$1.00—100 plants, \$3.00; 500 plants, \$13.50; 1000 plants, \$25.00; pot plants, \$6.00 100.

POT PLANT CHRYSANTHEMUM
CAPRICE

The chrysanthemums marked (*) as well as others may be successfully grown in 5 or 6 inch pots. In order to have them low and bushy they will need frequent pinching up until a few weeks before the buds appear. Pinch out the new growth allowing but one set of leaves above the recently formed crotch. After pinching new growth will start when again it shall be pinched in the same way, this method will keep the plants low and bushy. Pinching shall start when the plants are about 8 inches tall.

Plant Food

Chrysanthemum and other flowering plants are gross feeders, they all like a well drained, rich soil that has had an application of stable manure. While stable manure is becoming harder to get we have sought other sources of fertility. After trying a number of so-called commercial fertilizers we now use one known as 4-6-6 V. C. formula. We use it freely on any type of plant and find it especially good for feeding chrysanthemums applying it between the rows in dry form weekly until the buds appear. It makes a healthy, green, thriving plant and puts color into the bloom. It is economical and does not burn the plants. We are able to furnish some of this fertilizer from our regular source. 10 lbs. 40c—50 lbs. \$1.75—a bag 100 lbs. \$3.00 via freight or express collect.

GUARANTEE:

Every item I offer is guaranteed to be as represented in this list, and to reach you in healthy, growing condition. I will replace any plants that fail to grow, when reported within twenty (20) days or refund your money you have paid on any item you are not satisfied with upon your returning same. At no time do I assume responsibility for more than purchased price. This list cancels all previous offers.

NOTE: If when filling order we do not have the size clumps or pot plants you have ordered, we will (if on hand) send larger sizes at no increased cost. Also, when smaller sizes are (only) on hand we will make up the difference in quantity or refund the difference.

TESTIMONIALS

Lake Worth, Fla., June 19th, 1936.

Dear Mr. Lockard:—

Your Swiss Pansy plants have proved very satisfactory and have had fine blooms. I have had as many as twenty-five blooms at one time on one plant. Shall want more plants in the fall.

Very truly yours,
JOHN H. IRONS.

Coraopolis, Penna., May 29th, 1936.

Dear Sir:—

Your very nice plants arrived well packed and in good condition. I enclose another order and check for the amount.

Yours very truly,
MARGARET McKEEN.
